Education

M.A. in Economics, Sungkyunkwan University — Mar 2025 – Feb 2027 (expected)

- GPA: 4.33/4.50
  Thesis: The China Trade Shock Across the Life Cycle: Cohort Evidence from U.S. Commuting Zones
  Advisor: Prof. Jun Sung Kim

B.A. in Chinese Foreign Affairs and Commerce
Hankuk University of Foreign Studies — Mar 2017 – Feb 2022

- GPA: 4.10/4.50 (Ranked 2nd in Department)
  Double Major in English Linguistics

Research Interests

Applied Microeconomics, Urban Economics, International Trade, Labor Economics

Relevant Coursework

Math & Statistics (Graduate)	Real Analysis, Mathematical Statistics, Application of Linear Algebra, Calculus I
Economics (Graduate)	Microeconomic Theory, Econometrics, Applied Microeconomics and Data Analysis, Public Economics, Data Science for International Trade
Chinese Studies (Undergraduate)	Contemporary China's Economy, History of Chinese Economy and Commerce

Working Papers

[1] **The China Trade Shock Across the Life Cycle: Cohort Evidence from U.S. Commuting Zones**

This paper examines how Social Security eligibility shapes the poverty consequences of the China trade shock across U.S. commuting zones. Using an instrumental variables design, it finds that cohorts reaching age 62 increase Social Security receipt without a corresponding rise in poverty, while younger cohorts face comparable employment losses but greater exits without retirement income and higher poverty, particularly among women.

[2] **Electronics Manufacturing Clusters and Labor Market Adjustment to the China Trade Shock**

This paper examines whether the concentration of high-tech manufacturing moderates the labor market effects of Chinese import competition across 722 U.S. Commuting Zones over 1990–2019. High-tech commuting zones experienced milder employment and population losses during 1990–2010 and showed signs of recovery by 2019, while low-tech zones exhibited persistent declines in employment, wages, and housing values, with effects concentrated among workers without a four-year degree and among Black, Hispanic, and Asian workers. The findings speak to current debates on place-based industrial policy, including the CHIPS and Science Act of 2022.

Conference & Seminar Presentations

- **Asian & Australasian Society of Labour Economics (AASLE)**
  Peking University, Beijing (*Accepted for presentation*) Dec 2026
- **Western Economic Association International (WEAI) Annual Conference**
  Chulalongkorn University, Bangkok Apr 2026
- **Public Economics Lab Seminar**, SKKU
  Organized by Prof. Dongwon Lee 2025 – Present
  – Weekly research seminar in public economics; independent research presentations under faculty supervision.
- **Applied Micro Data Lab (AMDL)**, SKKU
  Organized by Prof. Jun Sung Kim 2025 – Present
  – Research lab focused on applied microeconomics, econometrics, and data-driven empirical research.

Additional Academic Training

LSE Summer School, London, U.K. Jul 2025
- IR112: Gender, Culture and Policy (Prof. Rohit Dasgupta) — three-week intensive program; certificate with Grade A.

MITx MicroMasters Program, edX 2026
- Statistics and Data Science (Methods Track): Probability, Fundamentals of Statistics, Learning Time Series with Interventions, Machine Learning with Python, Capstone Exam.

Scholarships

Full Tuition Graduate Scholarship, SKKU 2025 – 2026
Lee Deok-sun Scholarship (1-year full tuition), HUFS 2020
Department Chair's Academic Excellence Scholarship, HUFS Fall 2018
HUFS Women Alumni Scholarship Fall 2018
HUFS Faculty Alumni Scholarship Spring 2018

Skills and Languages

Programming: Stata, Python, R, LaTeX
Languages: Korean (Native)
English (Fluent;
TOEFL Overall 5.0/6.0, Reading 5.0, Listening 5.0, Speaking 5.0, Writing 5.5)
Chinese (Fluent; HSK Level 6)
